The interest in Personal Computing also started in the late 1970's when he was asked to

repair and maintain the 'hardware' for a new "start-up" company using Computers.

The IBM PC of the early 1980's brought more possibilities, and the later Apple Macintosh and Amiga platforms gave the real start to what we now refer to as Multimedia capability.

Networking.....And Modems !

..... led to Bulletin Boards, that led to "The Internet".

TODAY

We embrace new technology - and are actively working with Multimedia via the development and Integration of Linux and Windows technologies.

We continue to grow and expand our horizons
